This year, our catalog celebrates a universe full of colors, textures, and sizes, a reflection of the variety, quality, and innovation that inspire us every day at Sempertex. Inside, you'll find endless possibilities to create, driven by the passion and commitment we put into everything we do.

We proudly introduce the new Reflex Galaxy Blue, a shade that expands our palette and continues to inspire decorators around the world.

Education remains one of our core pillars. Following the success of the International Balloon Convention (IBC), we'll once again host our international convention in the United States, a space where inspiration and learning come together to keep creating unforgettable moments.

At Sempertex, we continue to expand our universe of color and quality, accompanying you in every creation and celebrating the dreams that come to life through balloons.

Este año, nuestro catálogo celebra un universo lleno de colores, texturas y tamaños: el reflejo de la variedad, calidad e innovación que nos inspiran cada día en Sempertex. En sus páginas encontrarás infinitas posibilidades para crear, impulsadas por la pasión y el compromiso que ponemos en todo lo que hacemos.

Presentamos el nuevo Reflex Azul Galaxy, un tono que expande nuestra paleta y nos invita a seguir inspirando a decoradores de todo el mundo.

La educación sigue siendo uno de nuestros pilares. Gracias al éxito del International Balloon Convention (IBC), estaremos celebrándola nuevamente en Estados Unidos, un espacio donde la inspiración y el aprendizaje se unen para seguir creando momentos inolvidables.

Sempertex balloons are optimal when inflated with helium or air. By physical law some balloons that are small in size and volume, are not recommended to be inflated with helium because the amount of gas contained will not be enough to lift them. Products that stand out with an asterisk (\*) are those not recommended to be inflated with helium.

Los globos Sempertex son óptimos para ser inflados con Helio y también con aire. Por ley física algunos globos debido a su menor tamaño o volumen no se recomienda inflados con Helio porque la cantidad de gas contenida no será suficiente para elevarlos. ## BALLOON SPECIFICATIONS / ESPECIFICACIONES

All R-12 balloons with Satin, Metal, Silk, and Reflex textures are manufactured on super-sized forms, making them appear bigger when deflated compared to balloons of the same size in Fashion, Pastel Matte, Pastel Dusk, and Neon textures. This design difference ensures that, once inflated, all balloons reach the same size regardless of texture.

The following table shows the average inflated size, lift ability, flying time, and the number of balloons per helium tank.

Todos los globos R-12 texturas Satin, Metal, Silk y Reflex se fabrican con moldes de mayor dimensión, que hace que cuando están desinflados luzcan más grandes en comparación con los globos del mismo tamaño de las texturas Fashion, Pastel Matte, Pastel Dusk y Neon. Esta diferencia en el diseño garantiza que, al inflarse, todos alcancen el mismo tamaño independientemente de la textura.

Esta tabla contiene la lista de tamaño inflado promedio, capacidad de elevación, tiempo de flotación y cantidad de globos por tanque de helio.

All Sempertex® latex balloons are helium quality with just the perfect weight to generate a quality barrier. Manufactured in Colombia from natural rubber latex.

Todos Los globos de látex Sempertex® son de calidad para helio con el peso adecuado para generar una barrera de calidad. Son fabricados en Colombia y hechos con látex de caucho natural.
